Product Description

TECHNICAL SPECIFICATION

Aluminized Fire Proximity Suit is made out of 16 oz imported aluminized glass fiber fabric with dual mirror having 95% reflection of heat as an outer layer and with woolen fabric lining. Additional layer (Vapor Barrier) is also used for higher temperatures.

Standard Features: -

- **Aluminized Fiberglass Fabric outer shell reflects 95% of radiant heat.**
- **Vapor barrier layer protects against steam and vapor.**
- **Layers of 1-inch fiberglass insulation for ambient heat protection.**
- **Fire-resistant vapor barrier lining.**
- **Complete set with Hood, Coat, Pants, Boots, Mitts, and Foot Locker Box or Duffle Bag for storage. Also available in one-piece coverall style.**
